To Whom It May Concern:

It has recently been brought to my attention that one of our local manufacturers is knowingly polluting our waterways and refuses to do anything about it.

A source from this steel mill (Granite City Steel) tells me that this condition could be simply resolved if the plant would put forth the effort.

As a strong public supporter of our community and a long time resident, I would like something to be done immediately. I understand there are laws against this type of contamination.

Please help!
